**Oneshot tuttuno 9:** Simultaneous dispensing machine aimed at creating filled products in a single operation, including pralines on polycarbonate mould, balls, eggs and products with special features. The machine injects in different times and ways chocolate and fillings in the percentages required by the customer, simultaneously creating the outer chocolate jacket and the inside of the praline. The tempering unit, located on the side of the machine, provides a continuous feed of chocolate by means of a recirculation pump. The filling is dispensed by the temperature-controlled hopper on the machine head.
